

Agent code (see your trail map):

Your name is not needed as we want to keep it anonymous. Your answers are not meant to judge your existing knowledge but to help us build better learning tools for people of your age!

- When you have a cold, cough, stomach ache, or fever that has lasted for more than two days, and you need medicine, who will you go to first? (Here doctor includes the family doctor)
 - Doctor
 - Chemist
 - Sometimes chemists, sometimes doctors, it depends
 - A family/friend who had the same illness

- What do you think antibiotic resistance means?
 - Our body is becoming resistant to antibiotic medicine
 - The bacteria are becoming resistant to the medicine
 - The antibiotic is resistant to the bacteria
 - I am not sure

- Superbugs are:
 - Microbes stronger than a bacteria
 - Bacteria, but those resistant to multiple antibiotics
 - Something on another planet (Planet Z)

- Name one disease caused by a pathogenic bacteria (disease-causing bacteria)

- Bacteria are always harmful to us.
 - True
 - False

- What are bacteriostatic and bactericidal antibiotics?

- Do you think antibiotics work on the common cold/flu?
 - Yes
 - No
 - I am not sure

- Would you like to be more involved in taking care of your family's health?
 - Yes, maybe a little more
 - No, I think I am doing enough for now
 - I am not sure

- On a scale of 0-5, how much does your being informed/educated on a topic of health matter to your community's physical wellbeing (good physical health)? Here 5 stands for - 'Matters a lot' and 0 stands for - 'Doesn't matter at all'

0 1 2 3 4 5

- Which activities did you like (refer to your trail map for names)? Tell us why?

- Of all the things you liked, which one was your favourite part?

- Which is the most interesting thing you learned?

- Can any activity be improved? How? (Refer to your trail map for the names).

- Which emotions/words can you associate with your experience in this workshop? Tick/circle all applicable.

Excitement

Fun

Boring

Complex

New

Inspiring

Creative

Tiring

Overwhelming (too much information/activities that it was difficult for you to grasp everything)

Active

Safe space to talk

- If you are from the Maths (only Maths, not Math Bio), Commerce or Humanities section, were the concepts easy for you to understand?

I am from the biology/Bio+Maths section

Yes, they were - The workshop started everything from a basic level

Some were fine, some were difficult

No, it was very complex. They were not suitable for Commerce/Humanities/Maths students

- If you are from the Biology or Math+Bio stream/ section, were the concepts easy for you to understand?

I am not from the Biology section

Yes, they were

Some were fine. Some were difficult

No, it was very complex

THANK YOU FOR FILLING THIS OUT!
