A-Maze-ing!

Rules

1) The circular dot is your key, as you can see on the left side of the maze.

2) Your goal is to solve the maze puzzle and reach the treasure box on the right-hand side of the maze.

3) Your circular key can open the treasure box and you will win the puzzle.

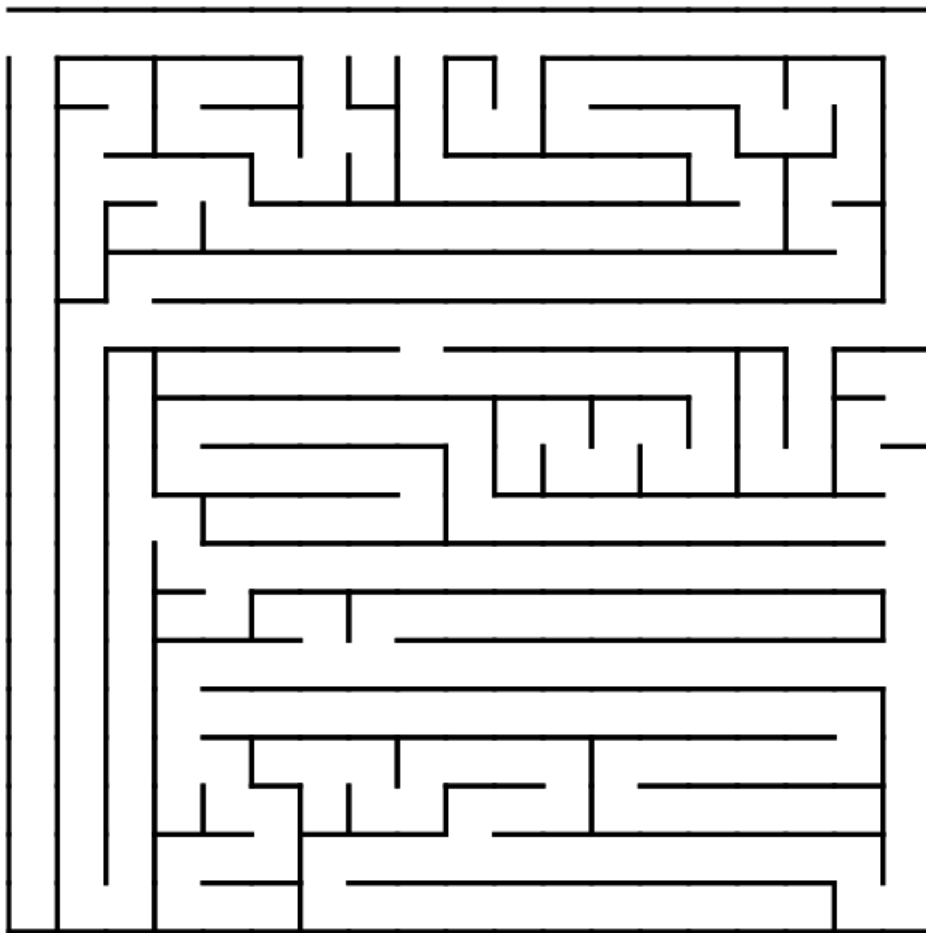

4) To reach the treasure box is not enough to win! The shape of your key should match the shape of the hole in the treasure box (circle to circle).

5) Beware the monsters. They look like this:

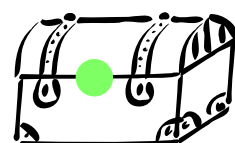

If you touch them or cross their path, you die and lose!

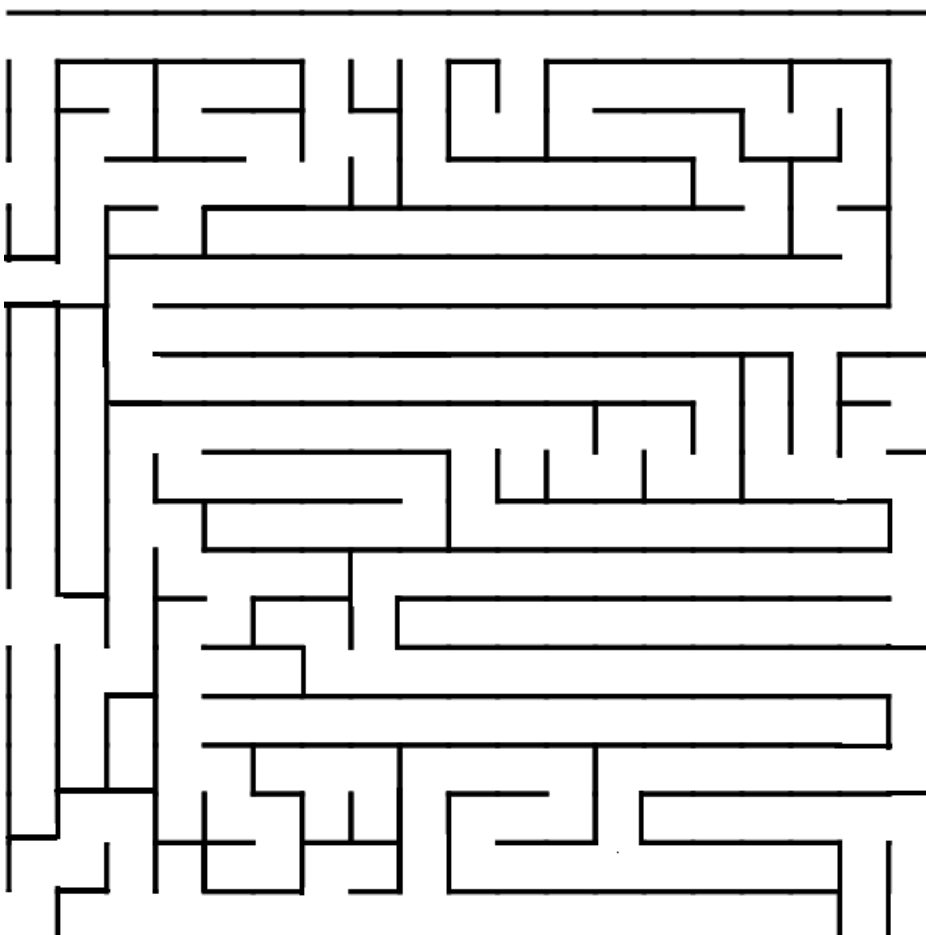

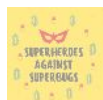

6) You cannot reach the treasure box from outside, you have to cross the maze to reach it. No experience, no gain!

Notes...

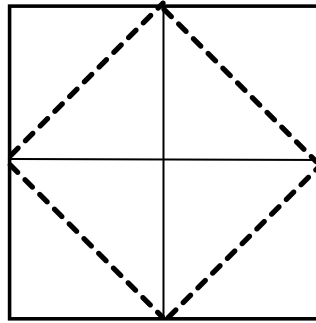

Build your own tippy tippy top prop!

- Sonal Katyal

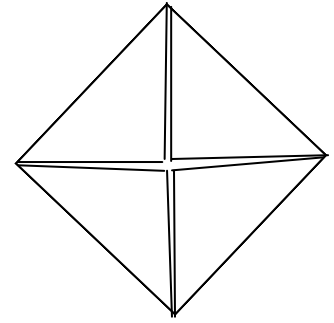

Fold a square paper in half. Open it. Turn 90 degrees. Fold in half again and open. you have two creases now.

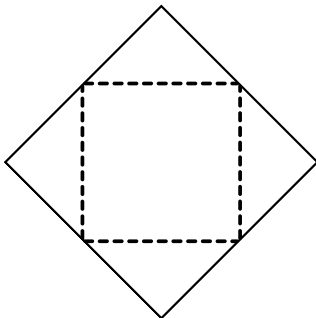

Now fold along along the dotted lines.

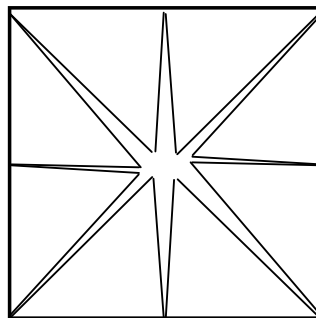

Your prop will look like this.

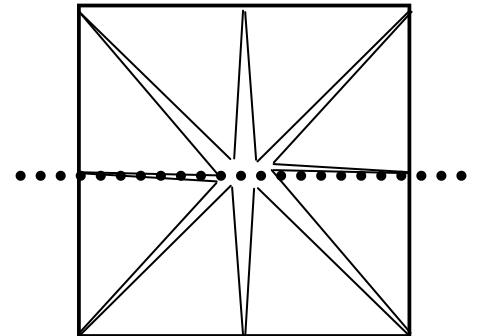

Flip to the backside and fold along the dotted lines

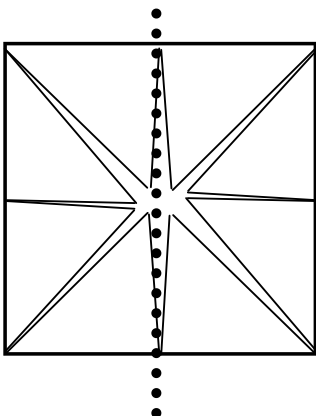

Your prop will look like this.

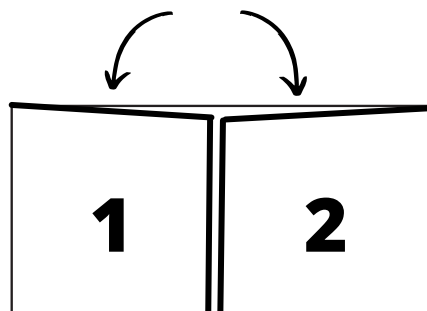

Now fold along the dotted line and open again.

Then fold along the dotted line shown.

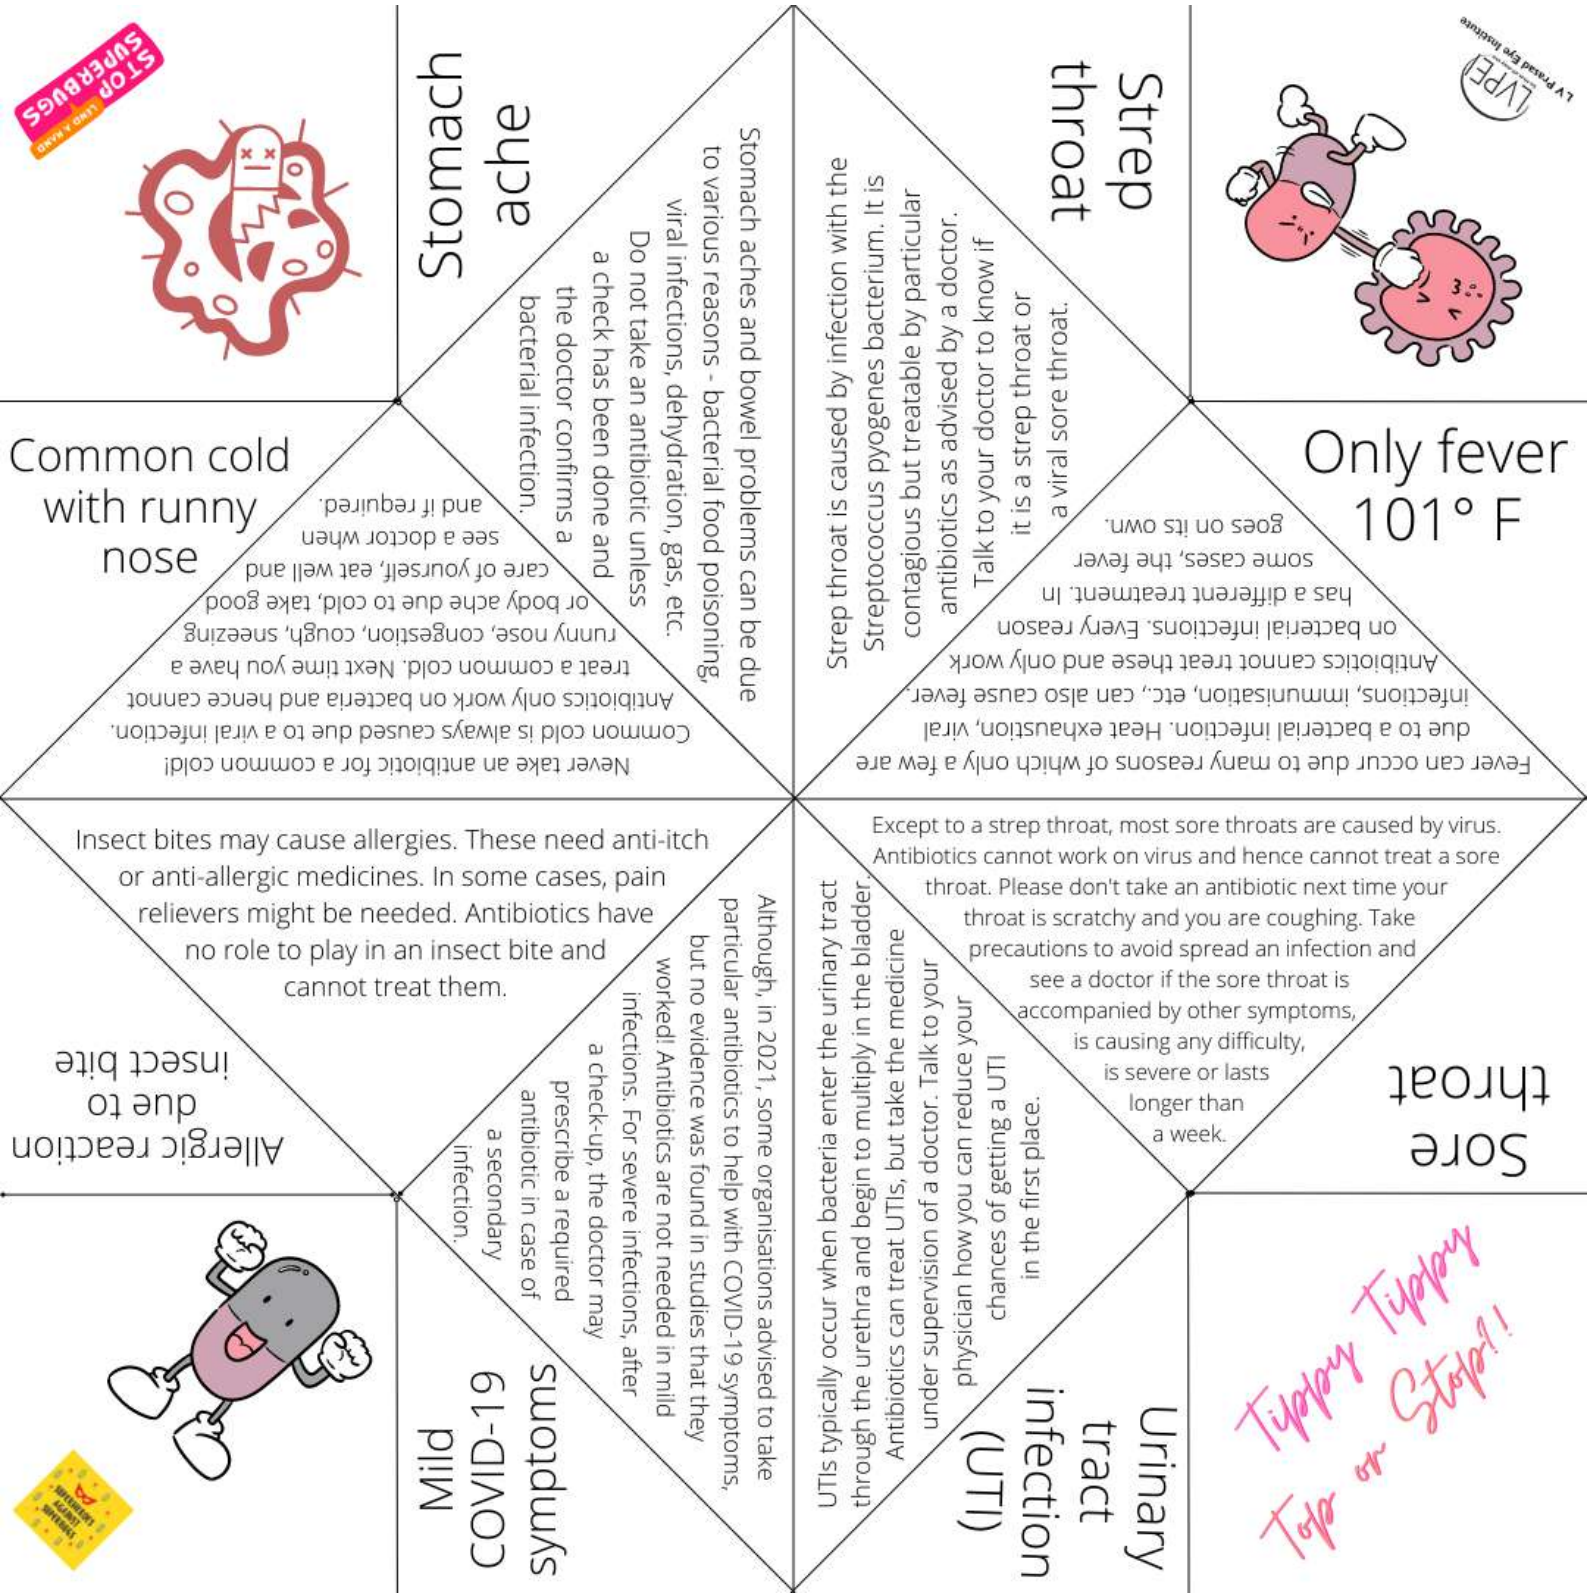

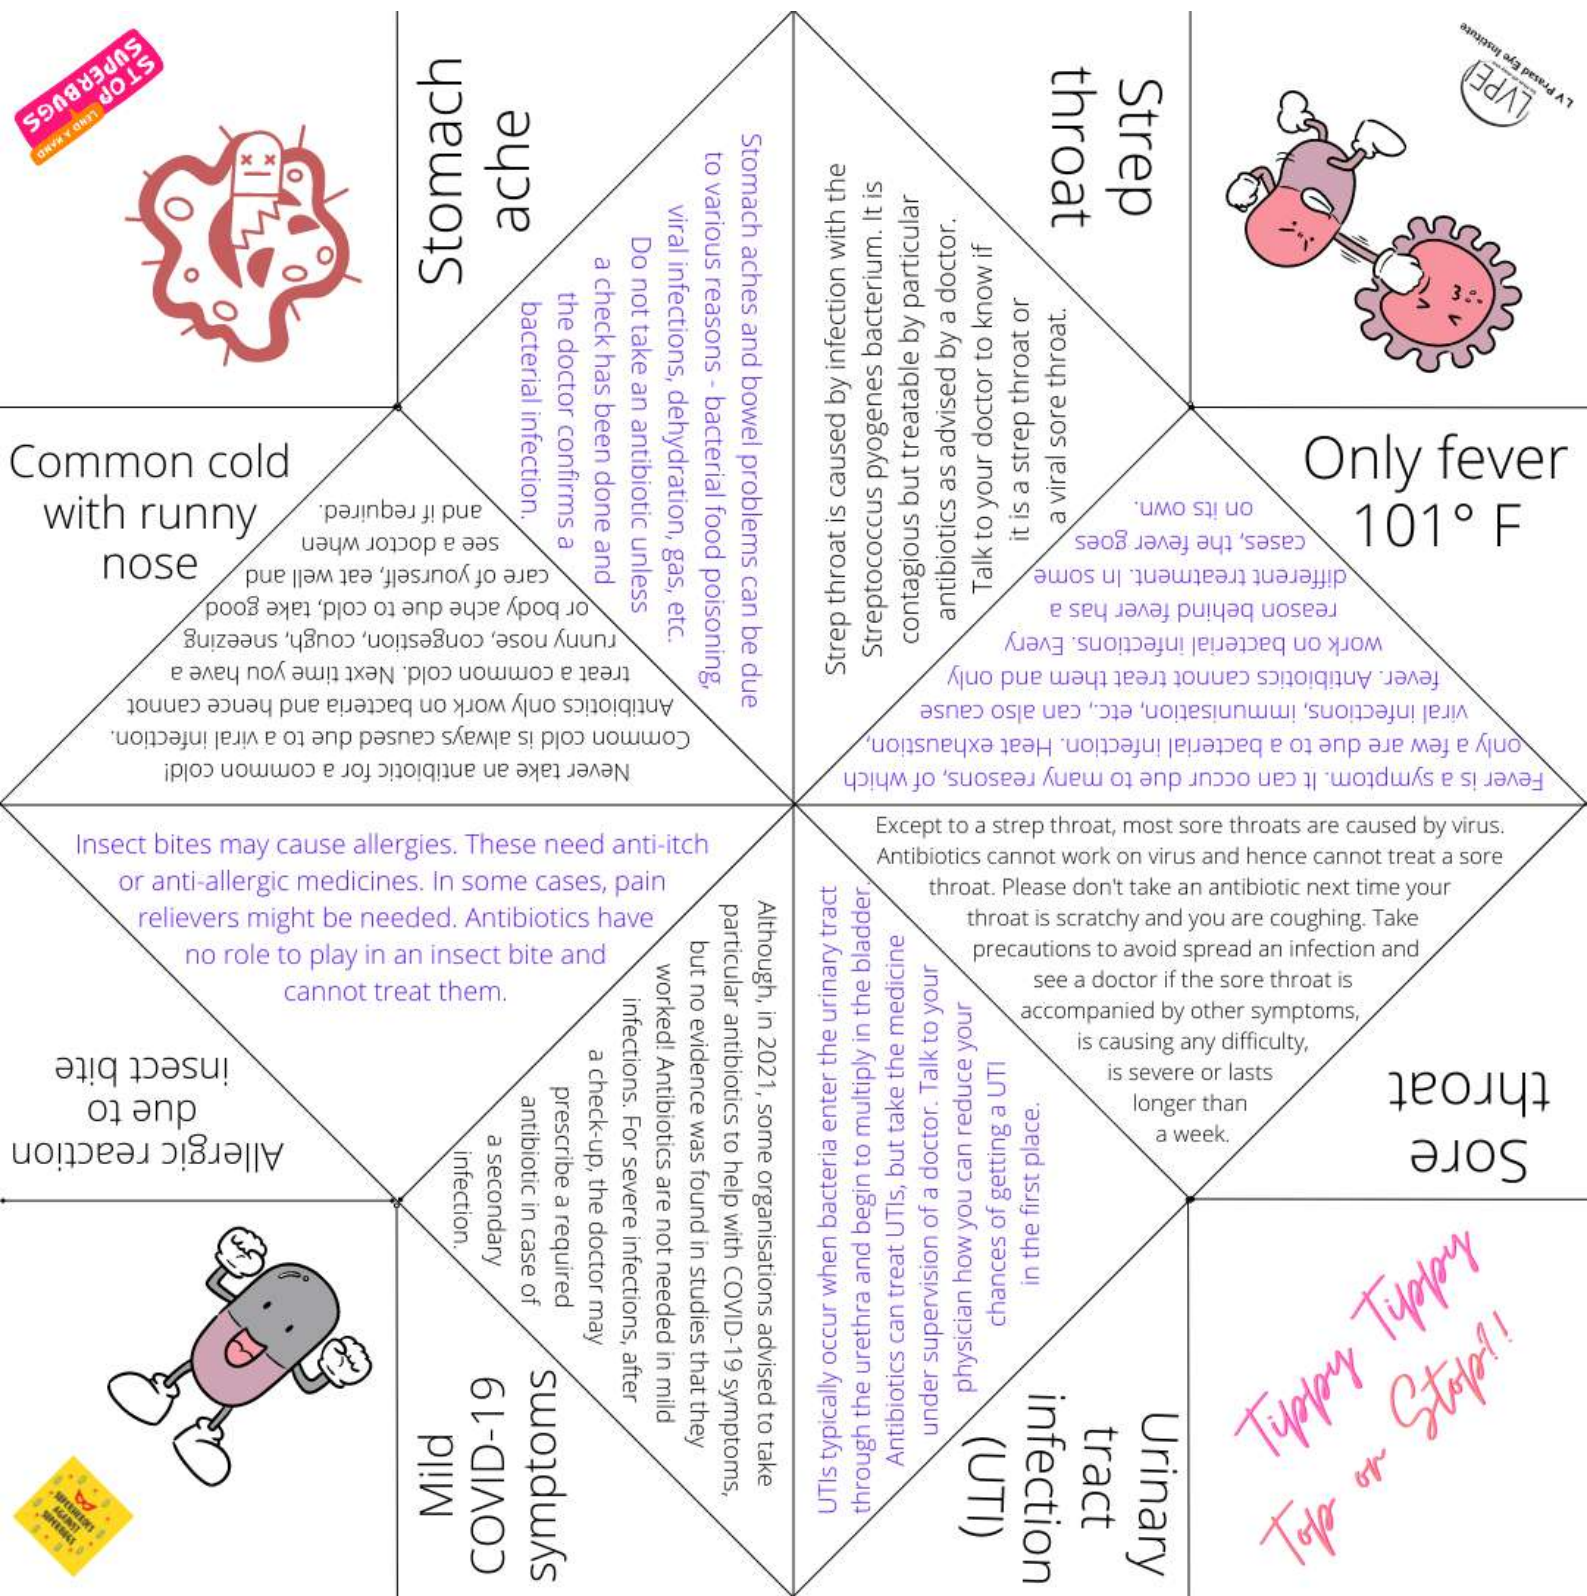

Yor prop will look like this. 4 pockets will be formed on each side.,like you see two here Put your index fingers and thumbs, one in each pocket

Open the pocket. It should look like this. You are done! Move it by pulling your index fingers away and bringing them back, then pulling the pairs of index finger and thumb away and bringing them back.
